Professional Summary

Passionate **React Native Engineer** with nearly **4 years** of production experience shipping high-impact mobile apps for a major U.S. restaurant chain serving millions of users. Expert in **TypeScript, Redux, and custom animated UI systems**, with hands-on native module integration and debugging (**Swift, Kotlin**). Delivered measurable impact: **30%** reduction in app startup time, **12%** sales lift from a self-driven feature launch, and ownership of complex Redux-driven gesture and animation architecture across authentication and transaction flows.

Technical Skills

Mobile	React Native, TypeScript, Redux, MobX, React Navigation, Reanimated, Firebase, REST APIs, Native Modules (Java, Kotlin, Swift), Hermes, JSC, Performance Profiling & Debugging (Android Studio, Xcode)
Languages	JavaScript (ES6+), TypeScript, Python, Java
DevOps & Tools	Git, Jenkins, Docker, Kubernetes, AWS (Lambda, S3), App Store & Play Store release management

Professional Experience

Software Engineer VRIZE	Sept. 2022 – Present <i>Remote</i>
- Engineered a fully custom, multi-instance toast/snackbar system supporting configurable hosts and stacked notifications, with custom spring-based enter/exit animations, replacing a third-party library and giving full control over timing and interruption behavior. - Built a fully custom, reusable, and animated modal component from the ground up, supporting configurable content and gesture-driven dismissal, used across multiple flows in the app. - Led the migration from react-native-modal to @gorhom/bottom-sheet's BottomSheetModal across authentication flows, resolving complex Redux-driven race conditions between gesture-based and programmatic dismissal using custom useAnimatedReaction hooks and worklet-safe dispatch patterns. - Implemented edge-to-edge display support on Android for target SDK 35 (Android 15) compliance, correctly handling system bar insets and safe-area layout to prevent UI clipping across screens. - Spearheaded a new Rewards feature ("\$X off on \$Y purchase") from concept to release, driving a 12% increase in sales and improved user engagement. - Implemented passwordless authentication with OTP and biometric verification, improving login security while reducing user friction. - Engineered a state-based store search feature, improving search accuracy and store discovery across large, high-density states. - Debugged Hermes/JSC runtime issues and profiled startup performance end-to-end, cutting app startup time by 30%. - Converted complex Figma designs into responsive, pixel-perfect UI using TypeScript, and implemented Redux- and CMS-driven state management with optimized API caching and pagination.	

Intern as Trainee Engineer VRIZE	Mar. 2022 – Jun. 2022 <i>Remote</i>
Contributed to an internal company website project, working across the .NET framework, HTML/CSS, Node.js, and SQL — gaining early production experience integrating multiple layers of a full-stack application.	

Education

B. V. V. Sangha's Basaveshwar Engineering College <i>Bachelor of Engineering in Computer Science and Engineering, CGPA : 8.65/10</i>	Baglkot, Karnataka, India <i>Aug. 2018 – Jul. 2022</i>
--	---

Achievements

- Rising Star of the Year Award** – VRIZE, for exceptional contributions and dedication.
- Go Getter Award** – VRIZE, for significant contributions to project delivery and team success.
- Rank 1, Spoken Tutorial Training in Python** (IIT Bombay); selected for the International Technology Data Science Bootcamp 1.0 by IEEE Madras.
