Professional Summary

Passionate **React Native Developer** with **3+ years** of experience building high-quality, cross-platform mobile apps for iOS and Android. Proficient in **TypeScript, Redux, and React Navigation** with a strong grasp of **performance tuning, debugging (Hermes/JSC), and native integrations using Swift**. Experienced in leading feature delivery, optimizing build pipelines, and publishing to App Store & Play Store. Recognized for innovation and ownership, with multiple performance awards.

Technical Skills

Mobile	React Native, TypeScript, Redux, MobX, React Navigation, Firebase, REST APIs, Native Modules (Java, Kotlin, Swift), Hermes, JSC, Android Studio, Xcode
Languages	JavaScript (ES6+), TypeScript, Python, Java
DevOps	Git, Jenkins, Docker, Kubernetes, AWS (Lambda, S3)
Learning	CodePush, Zustand, Fastlane, Reanimated 3, App Store & Play Store Deployment

Professional Experience

Software Engineer <i>VRIZE</i>	Sept. 2022 - Present <i>Remote</i>
- Developed and maintained production React Native apps for a major U.S. restaurant chain with millions of users. - Converted complex Figma designs into responsive, pixel-perfect UIs using TypeScript and React Native styling. - Implemented Redux-based and CMS-driven state management with optimized API caching and pagination. - Debugged Hermes/JSC runtime issues and optimized app startup time by 30%. - Spearheaded the development of a new Rewards feature (“\$X off on \$Y purchase”), leading to a 12% increase in sales and improved user engagement. - Successfully implemented Passwordless Authentication with OTP and biometric verification, enhancing login security and reducing friction for end-users. - Engineered a State-Based Store Search functionality, optimizing search accuracy and improving store discovery across larger states.	

Education

B. V. V. Sangha's Basaveshwar Engineering College <i>Bachelor of Engineering in Computer Science and Engineering, CGPA : 8.65/10</i>	Baglkot, Karnataka, India <i>Aug. 2018 - Jul. 2022</i>
--	---

Achievements

- Awarded the **Go Getter Award** for significant contributions to project delivery and team success.
- Earned the **Rising Star of the Year** Award at **VRIZE**, showcasing exceptional contributions and dedication.
- Achieved the **1st Rank** in Spoken Tutorial Training in **Python** conducted by **IIT Bombay**, demonstrating proficiency in the programming language.
- Secured a score of **69.95 in Cognitive Total** and **88.33 in Subject NQT: IT Programming** in the **TCS National Qualifier Test (NQT)**.
- Selected for the **International Technology Data Science Bootcamp 1.0** by **IEEE Madras**, recognizing proficiency and potential in the field of Data Science.

Internships

Trainee Engineer

Mar. 2022 – Jun. 2022

VRIZE

Remote

- Contributed to the development of an internal company website, working across the .NET Framework, HTML, CSS, Node.js, and SQL.
- Collaborated with senior developers to implement new features, resolve issues, and gain hands-on experience with full-stack application development.
- Built a strong foundation in software development practices, version control, debugging, and cross-functional collaboration within an Agile environment.
- Gained practical experience integrating multiple technologies while delivering production-ready enhancements for internal business applications.

Projects

Intelligent Garbage Collection System | *Embedded C, Python, OpenCV, TensorFlow, WinAVR* Nov. 2021 – Apr. 2022

- Designed an IoT-based smart waste management system to monitor garbage levels in bins using sensors and wireless communication.
- Implemented real-time monitoring where bins automatically notified the central station upon reaching threshold capacity.
- Developed an optimized route-planning mechanism that enabled an autonomous robot to collect waste efficiently and return to the central hub for unloading before resuming operation.

Uber Fare Prediction (Personal Project) | *Machine Learning, Python, Jupyter*

Jul. 2021 – Dec. 2021

- Built a machine learning model to predict ride fares using historical trip data and regression techniques.
- Performed data preprocessing, feature engineering, model training, and comparative evaluation to improve prediction accuracy.

Kaksha (Android Application) | *XML, Kotlin, Firebase*

Mar. 2021 – Jun. 2021

- Developed an Android application for colleges to streamline communication between faculty and students.
- Enabled faculty to create classes dynamically while automatically enrolling students based on department, semester, and division.
- Implemented quiz creation and participation features with automatic result generation for faculty members.

Position of Responsibility

- Led a team of **4 members** in the successful execution of the final-year engineering project, demonstrating leadership and project management skills.
- Managed a team of **10 volunteers** to organize and execute social initiatives under **Digital India** and **Swachh Bharat Abhiyan** across villages and public locations.
- Mentored and coordinated a team of **5 volunteers** to ensure the timely completion of academic project deliverables while maintaining quality standards.
